DETAILED ACTION

Allowable Subject Matter

Claims 1-23 and 25-27 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to the independent claims 1,6,12,18 and 19, Perdue (US Patent 5563768) teaches a base configured to coupled with a circuit board, the base defining a first end and a second end, and a plurality of deflectors in communication with the base and arranged in series between the first end and the second end defined by the base, each of the plurality defining leading edge. Perdue does not teach that the height defined by the leading edge of each deflector increases along an air stream direction, furthermore there is no evidence in the prior art making this modification obvious as in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
